An act to add Section ~~66205.3~~ 66205.8 to the Education Code, relating
to ~~public postsecondary education~~ *the California State University*.

LEGISLATIVE COUNSEL'S DIGEST

SB 147, as amended, DeSaulnier. ~~University of California and
California State University:~~ career technical education courses.

The Donahoe Higher Education Act sets forth, among other things, the missions and functions of California's public and independent segments of higher education and their respective institutions of higher education. Existing law establishes the California State University, under the administration of the Trustees of the California State University, ~~and the University of California, under the administration of the Regents of the University of California,~~ as ~~2~~ *as one* of the segments of public postsecondary education in this state. ~~The act provides that its provisions apply to the University of California only to the extent that the regents act, by resolution, to make these provisions applicable.~~

A provision of the act requires the California State University ~~and the University of California~~ to establish model academic standards for high school courses, *including career technical courses*, for pupils who

wish to attend ~~those institutions~~ the California State University. The act requires the California State University to recognize the completion of all high school career technical education courses that meet model curriculum standards established by the Superintendent of Public Instruction as satisfying the completion of a general elective course requirement for the purposes of admission to that university, if, by July 1, 2008, the university has not adopted model uniform academic standards for career technical education courses that will satisfy the completion of a general elective course requirement for the purposes of admission to the university.

Existing law requires the Superintendent of Public Instruction to coordinate the development, on a cyclical basis, of model curriculum standards for a high school career technical course of study. Existing law also requires the ~~superintendent~~ Superintendent to develop a career technical curriculum framework based on prescribed criteria.

This bill, notwithstanding any other provision of law, ~~beginning on or before January 1, 2014, would require the trustees, and strongly urge the regents, to determine which high school career technical education courses satisfy the completion of a general elective course requirement for purposes of admission to that university~~ to develop and implement a procedure for allowing a student to satisfy the completion of a general elective course requirement for the purposes of admission to the university by completing a high school career technical education course that meets either (1) specified criteria that the bill would require the trustees to establish, or (2) model academic standards for high school courses adopted by the California State University pursuant to existing law. The bill would require the trustees to adopt related requirements based on the recommendations and judgment of the Academic Senate of the California State University.

Vote: majority. Appropriation: no. Fiscal committee: yes.
State-mandated local program: no.
